ABOUT ME

Product-focused React Native Developer with 5+ years of experience engineering scalable, high-performance mobile applications for iOS and Android. Proven expertise in component-based architecture, real-time data synchronization (WebSockets, WebRTC), and integrating AI-powered features using OpenAI and Gemini APIs to build intelligent workflows. Adept at leading cross-functional teams, managing CI/CD pipelines (GitHub Actions, Fastlane), and resolving complex production issues to deliver seamless, crash-free user experiences.

EDUCATION

Bachelor of Computer Applications - 83%

Sankara college of science and commerce | 2018-2021

PROFESSIONAL EXPERIENCE

Unimity Solutions | Analyst Programmer | JAN 2025 - Present

FK LMS Mobile Application (React Native, Firebase)

- Managed end-to-end development of the FK LMS app, implementing location-based check-in/check-out and comprehensive lead tracking modules for 3000+ users.
- improved frontend rendering and API payloads, reducing latency by 30% and ensuring seamless background state handling.
- Enhanced app stability and maintained clean code standards by integrating Firebase Crashlytics and enforcing SonarQube quality checks.
- Managed complex application lifecycles, guaranteeing seamless background execution, robust killed-state handling, and reliable notification delivery.

Unicommerce Application

- Spearheaded the complex architectural migration of the enterprise application from Angular 12 to Angular 19, modernizing the codebase and boosting rendering performance by 45%.
- Systematically resolved 90+ legacy bugs and tackled deep technical debt, significantly improving overall application stability and reducing user-reported errors by 15%.

Uniflow Automation Platform

- Architected and launched an AI-driven automation platform built on Next.js and Supabase, natively integrating OpenAI and Gemini APIs to fully automate Business Analyst documentation.
- Engineered intelligent prompt workflows that instantly generate comprehensive business requirements (BRDs) and system specs, reducing manual documentation time by 70% and accelerating project lifecycles.

SKILLS

- **Languages :** JavaScript (ES6+), TypeScript, HTML, CSS
- **Frameworks :** React Native, React.js, Angular, Redux, Next.js, Context API
- **Backend & Services :** Firebase (Crashlytics, Firestore, Analytics, FCM),supabase
- **Real-time :** WebRTC, WebSockets, Socket.IO
- **State Management :** Redux, Redux Toolkit, Context API APIs & Data: REST, JSON, Async programming
- **CI/CD & Tools :** Git, GitHub Actions, Jenkins, Android Studio
- **Quality :** Debugging, Performance optimization, Production triage, Root cause analysis, Release support, Code reviews,Jest, SonarQube

Future Focus Infotech | **React Native Developer - Team Lead** | **OCT 2024-JAN 2025**

MTNMoMo | Client Location - Unimity Solutions

- Led a 9-member team to deliver a production-grade React Native payment application
- Built scalable app architecture using React Native, Redux, and REST APIs
- Integrated with microservices-based backend systems for efficient and modular data flow
- Managed Play Store & App Store releases, including deployment and post-release support
- Resolved 20+ production issues with root-cause analysis and quick hotfix delivery
- Collaborated with cross-functional teams to accelerate releases and unblock issues

Connected Digital System Pvt Ltd | **Software Engineer** | **SEP 2023 - SEP 2024**

DICI - Digital Classroom Infrastructure

- Developed stable video/audio conferencing modules using the Jitsi Meet SDK for the DIIS Android app, driving a 30% increase in daily active users engaging with the classroom feature.
- Optimized cross-module workflows and lifecycle states to handle network fluctuations, maintaining 80% call stability.

Dimmenxion Chat Application

- Developed a real-time chat application using WebSocket connectivity, enabling low-latency instant messaging
- Implemented one-to-one chat and SIP-based calling functionality for seamless voice communication
- Integrated SIP protocol to ensure reliable call handling and improved connection stability
- Designed efficient message handling for real-time data synchronization across devices
- Implemented robust connection and reconnection logic to handle network fluctuations and minimize message loss
- Managed call state handling to ensure consistent and stable communication performance

CodeTez Technologies Pvt Ltd | **Software Engineer** | **AUG 2021 – AUG 2023**

FRESHMA

- Enhanced an online ordering system for marine food products using React Native and JavaScript for Android and iOS platforms
- Designed and implemented user-friendly UI/UX for browsing products, cart management, and order placement
- Integrated Razorpay payment gateway for secure and seamless transactions
- Built efficient API integration for real-time order processing and status tracking
- improved app performance and ensured smooth navigation across different devices
- Boosted user engagement by 30% via Firebase push notifications and optimized performance for edge-case resilience across devices.
